What is UI – User Interface?

User interface (UI) design is the process designers use to build interfaces in software or computerized devices, focusing on looks or style.

Designers aim to create interfaces which users find easy to use and pleasurable.

What is UX – User Experience?

User experience (UX) design is the process design teams use to create products that provide meaningful and relevant experiences to users. This involves the design of the entire process of acquiring and integrating the product, including aspects of branding, design, usability and function.

Tutor Details

Vishnupriya is a young and upcoming name in South India's UI/UX Development circuit. She has developed interfaces for several of South India's leading startups and provided her input via consulting on several international projects. She began her career designing posters for the Malayalam movie industry and quickly transitioned to her role in the IT sector when she discovered her passion for user flows and design. Her course will bring you up-to-date on the present trends in UI/UX Development, with live projects and hands-on learning. Her course will be an addition that changes the trajectory of your professional career.
